Seven New Dairy Industry Projects To Be Undertaken

Seven new projects in dairy industries are to be undertaken by the University of California College of Agriculture, one in the College of Home Economics, and two in the College of Agriculture. The funds for these projects, which range from $2,000 to $10,000, were approved by the University's Board of Regents at its meeting last month.

The fields of investigation include: (1) Canning Tomatoes, by Walter D. Voorhies; (2) Turkeys, by Edwin C. Voorhies; (3) Eggs, by Edwin C. Voorhies; (4) Poultry and Pigs, by Edwin C. Voorhies; (5) Dairy products, by Edwin C. Voorhies; (6) Dairy milk, by Edwin C. Voorhies; (7) Milk and milk products, by Edwin C. Voorhies.

The projects are designed to discover new uses for milk and milk products, and to study the effects of heat on milk with especial reference to the nutritive values of milk and its products. The projects are being undertaken by the Dairy Industry, by James W. Tarbell; Barlett Pears, by Sidney S. Neos; Postage and Eggs, by Edwin C. Voorhies; The Olive Industry, by Arthur Schulz; Apricots, by Shwood W. Shear; Canning Tomatoes, by Walter D. Voorhies; Turkeys, by Edwin C. Voorhies; and Eggs, by Edwin C. Voorhies.
