

INDEX

Volume II, January to December, 1948, Inclusive

Requests for back numbers will be filled, without charge, so long as the supplies last. Address all requests to CALIFORNIA AGRICULTURE, Publication Office, University of California, Berkeley 4, California.

- A**
- ABSCISSION
Chemical control of
Sept., page 6
- ALMONDS
Cost study
Feb., page 2
Suction harvester
March, page 11
- ANEMIA
Prevention, in pigs
Jan., page 12
- APHIDS
Control on potatoes
Sept., page 4
- APRICOTS
Skin toughening
Dec., page 10
- ASH PLANT BUG
Control
March, page 13
- ASTER LEAF MINER
Promising control
Jan., page 11
- AVOCADOS
Alternate bearing
Sept., page 5
Mealybugs on newly grafted
Feb., page 9
Root-rot experiments
June, page 7
- B**
- BARLEY
Atlas 46
May, page 15
On root-rot infested soil
May, page 14
- BEANS
Blackeye 5
July, page 14
Hard seeds in
Oct., page 4
- BIG TREES
Sequoia gigantea
Aug., page 3
- BLACK-END
Problem on pears
June, page 8
- BOOMS, DEPRESSIONS
Causes outlined
Jan., page 2
- BREAK
In feeder lambs, causes
April, page 7
- BRUCELLOSIS
Vaccination law explained
Jan., page 9
- BUD MOTH
On prunes
Oct., page 11
- C**
- CATERPILLARS
Pests on tomatoes
July, page 10
- CATTLE
Artificial shading
May, page 5
Breeding yearling heifers
Nov., page 5
Brucellosis vaccination law
Jan., page 9
Grub control
Oct., page 5
- CECAL COCCIDIOSIS
Control with sulfa
Sept., page 13
- CELERY
Fertilization benefits
Sept., page 4
- CHEMICAL WEED CONTROL
See "Weed Control"
- CITRUS
Crowded orchards
Oct., page 9
Exocortis, trifoliolate orange
Oct., page 13
Pests and 2,4-D
Sept., page 3
Pre-harvest drop, navels
July, page 5
Quick decline carriers
Dec., page 3
Quick-decline, sweet-root host
June, page 14
Red mite control tests
June, page 12
Red scale, DDT control
July, page 15
Red scale, control tests
Jan., page 13
Research, general
March, page 12
Rootstocks, identification
Aug., page 8
Scale insects, fumigation
Nov., page 7
Small sizes, oranges
Nov., page 4
Stubborn disease
Aug., page 4
Thrips
Feb., page 11
Twig die-back
Aug., page 16
- CLINGSTONE PEACHES
Economic status, Calif.
June, page 2
- CODLING MOTH
On walnuts, S. Calif.
July, page 4
- COLOR RETENTION
In food processing
Dec., page 4
- CONCENTRATE SPRAYS
For deciduous fruits
April, page 3
- CUT FLOWERS
Commercial production
Oct., page 15
- D**
- DEHYDRATION
Of figs
June, page 4
Of freestone peaches
July, page 9
- DIE-BACK
Of citrus fruit stem
Sept., page 7
- DRY-BARK
Disease on lemons
July, page 13
- E**
- ESTROGENS
Feeding turkeys
April, page 6
- EXOCORTIS
Effects on trifoliolate orange
Oct., page 13
- ECONOMIC OUTLOOK
Agriculture, December 1948
Dec., page 2
Clingstone peaches
June, page 2
Farm price stabilization
Aug., page 2
Head lettuce, 1947
May, page 2
Pacific coast pears
April, page 2
Potatoes, 1948
Nov., page 2
See "Price Supports"
Real Estate, farm
March, page 2
Walnuts, April, 1948
July, page 2
- F**
- FARM
Price stabilization
Aug., page 2
Tenancy
Sept., page 2
- FARMING
Management of commercial
March, page 7
- FEED
Sources surveyed
May, page 4
- FERTILIZATION
Celery
Sept., page 4
- Nitrogen utility
Jan., page 11
Potash, on oranges
June, page 3
Vineyard
June, page 8
- FIGS
Seedless, without caprifigs
Feb., page 7
- FIRES
Forest, hidden losses
Oct., page 3
- FLAX
Punjab variety
March, page 10
- FLY STRIKE
Sheep, contact poisons
March, page 14
- FORAGE
Plants for drouth years
April, page 4
New plants certified
Jan., page 7
Sudangrass poisoning
Nov., page 13
See "Pastures"
- FREEZING
Liquid sugars in
Aug., page 12
- FROST PROTECTION
With wind machines
Dec., page 5
- FUMIGATION
Citrus scale control
Nov., page 7
- FUNGUS FLORA
In citrus soils
Feb., page 4
- G**
- GOATS
Milk, breeding program
Jan., page 4
- GRAPEFRUIT
Preharvest drop
Aug., page 10
- GRAPES
Maturity, heat summation
March, page 5
Scarlet variety
Aug., page 4
Seedless table varieties
July, page 8
Wine, new varieties
June, page 11
- H**
- HARVESTER
Suction, for almonds
March, page 11
Sugar beet
May, page 3
- HEAD LETTUCE
Commercial, status 1947
May, page 2

- HEALTH**
Concepts, broadened
Jan., page 7
- HOUSING**
Transient labor needs
Jan., page 8
- I**
- INSECTICIDES**
Concentrate sprays
On deciduous fruits
April, page 3
Low-volume spraying
June, page 5
See "Organic Phosphate
Insecticides"
- IRRIGATION**
In deficit rainfall year
March, page 3
Field, truck crops
May, page 8
Practices compared
June, page 6
Sprinkler system
Nov., page 3
- K**
- KETOSIS**
Disease, cows, sheep
Oct., page 6
- KLAMATH WEED**
Biological control
May, page 12
- L**
- LABOR**
Housing transient
Jan., page 8
- LEMONS**
Budding of Eureka
Jan., page 3
Wood pocket disease
Sept., page 12
- M**
- MEALYBUGS**
On newly grafted avocados
Feb., page 9
On pears
March, page 6
- MECHANIZATION**
Harvesting
Dec., page 8
- MILK**
Whole, dry processing
Nov., page 10
- MILK GOATS**
Breeding program
Jan., page 4
- MOLYBDENUM**
Effect on livestock
May, page 6
- N**
- NEMATODES**
Root-knot
Nov., page 9
Sugar beet
Nov., page 8
- NURSERY SEEDLINGS**
Mechanical production
Oct., page 10
- NUTS**
See "Almonds," "Walnuts"
- O**
- OLIVES**
Studies to increase yields
Oct., page 10
Fruit growth
Dec., page 7
- ONIONS**
Seed yield trials
Sept., page 11
- ORANGE TORTRIX**
Deciduous fruit pest
Aug., page 13
- ORANGES**
Small size problem
Nov., page 4
- ORGANIC PHOSPHATE
INSECTICIDES**
Research and recommendations
April, special supplement
Aerosol fog, *page 12*
Alfalfa butterfly, *page 19*
Aphids, mites on pears,
prunes, *page 5*
Black scale, olives, *page 12*
Calif. cotton insects, *page 16*
Field tests, grapes, *page 13*
Fig scale, *page 9*
Grape bud mite, *page 2*
Grape leafhopper, *page 11*
Greenhouse plants, *page 17*
Melon insects, mites, *page 6*
Mosquito larvae, *page 22*
Olive scale, *page 8*
Red spiders, grapes, *page 2*
Spring dwarf nematode,
page 23
Tests on bees, *page 20*
Walnut aphid, *page 7*
- ORIENTAL FRUIT MOTH**
Problem in California
Feb., page 13
Wasps aid control
Feb., page 8
- P**
- PARATHION**
New insecticide
Feb., page 3
Tests, trials
See "Organic Phosphate
Insecticides"
Special supplement, April
- PASTURES**
Irrigated
Oct., page 7
Management
July, page 6
See "Forage," "Sudangrass"
- PEARS**
Mealybug infestation
March, page 6
Pacific coast situation
April, page 2
- POTATOES**
Aphid control
Sept., page 4
Situation, 1948
Nov., page 2
- POULTRY**
Diseases, sulfa control
Sept., page 13
Hexamitiasis, poult
Nov., page 15
- Husbandry, 1947 report
Feb., page 5
Pneumoencephalitis
June, page 13
Pneumoencephalitis
Control with live-virus
Dec., page 6
- PRE-HARVEST DROP**
Control, navel oranges
July, page 5
- PRICE SUPPORTS**
Agricultural Act of 1948
Oct., page 2
- PRUNES**
Bud moth on fruit
Oct., page 11
Products
Nov., page 12
Sizes, cultural effect
May, page 7
Superior quality pack
Aug., page 11
Upgrading orchards
May, page 11
Use in dog food
Aug., page 11
- PRUNING**
Pneumatic
Nov., page 11
- Q**
- QUICK DECLINE**
Research summarized
March, page 12
Sweet root host
June, page 14
- R**
- RANGES**
Brush control
July, page 3
- REAL ESTATE**
Farm, reviewed
March, page 2
- RODENTS**
Rat, mice control
Sept., page 10
- S**
- SALT WATER**
Intrusion in wells
July, page 12
- SAMPLING**
Fruits, vegetables; mechanized
Oct., page 8
Soil, mechanized
Feb., page 15
- SEEDS**
Hard, in beans
Oct., page 4
Vegetable, pelleting
Aug., page 6
- SHADES**
Artificial for livestock
May, page 5
- SHEEP**
Break in feeder lambs
April, page 7
Ketosis studied
Oct., page 6
Production recommendations
May, page 13
- SOIL**
Analysis guide
Feb., page 14
Power-operated sampler
Feb., page 15
- STUBBLE MULCH**
Erosion protection
March, page 4
- SUDANGRASS**
Livestock poisoning
Nov., page 13
- SUGAR BEETS**
Harvester
May, page 3
- SUGARS**
Synthesis
Dec., page 11
- SULFURING**
Operation of sulfur house
July, page 11
- SWINE**
Anemia in pigs
Jan., page 12
Bacon-type hog production
Sept., page 15
- T**
- TOMATO**
Caterpillar pests
July, page 10
New canning variety
March, page 14
- TURKEYS**
Hexamitiasis in poult
Nov., page 15
Recent production research
Jan., page 5
- U**
- UREA**
Supplemental feed
Feb., page 10
- V**
- VETERINARY**
New school at Davis
May, page 4
- W**
- WALNUTS**
Codling moth control
July, page 4
Situation, April, 1948
July, page 2
- WEDGELEAF CEANOTHUS**
Control methods
July, page 3
- WEED CONTROL**
Costs
March, page 8
Equipment
July, page 7
Klamath
May, page 12
Spray seedlings
Aug., page 7
Sprays compared
Oct., page 8
- WINEGROWING**
Temperature controls
April, page 5
See "Grapes"
- WOOL**
Improvements by breeding
Aug., page 5
