

INDEX-1954

Volume 8, January to December, Inclusive

Requests for back numbers will be filled, without charge, so long as supplies last. Address all requests to **CALIFORNIA AGRICULTURE**, 22 Giannini Hall, University of California, Berkeley 4, California.

A

ACREAGE

Cotton Allotments
Jan., page 2

ALFALFA

Growth and irrigation
Effect on water table

May, page 4

Irrigation
Close control needed

May, page 4

Land-use pattern
Cotton allotments

Jan., page 2

Lambs, winter feeding
Imperial Valley

Jan., page 5

Yellow clover aphid
Discovered in California

Sept., page 5

ANTELOPE VALLEY

Ground-water overdraft
Limited water resources

Mar., page 2

Increasing demands

Apr., page 2

Balance required

May, page 2

APPLES

Box making
Methods and costs

Feb., page 2

Spider mite
Late summer infestation

June, page 14

Woolly aphid
Late summer infestation

June, page 14

APRICOTS

Canned
f.o.b. prices

Oct., page 3

ARTICHOKES

Plume moth control
Sanitation, cultural practices

July, page 7

ASPARAGUS

Mechanical harvester
Efficiency increased

Sept., page 3

AVOCADO

Seedling growth
Soil chemicals

Feb., page 7

Biuret
Toxic nitrogen

June, page 7

2,4-D Treatment
Vegetative growth improved

March, page 12

Root rot
Fumigation of soil

Nov., page 10

B

BARLEY

Feeding ration
Laying hens

March, page 15

BEANS

Lima
Defect in freezing

Nov., page 7

Heat-tolerant

March, page 5

Quality in frozen

Nov., page 6

Subirrigation
Use of artificial moles

Aug., page 5

BEETS

Brassica-root nematode
In Half Moon Bay area

Jan., page 13

Fumigation
Root knot nematode control

July, page 6

BIURET

Toxic form of nitrogen
Avocados and citrus

June, page 7

Leaf symptoms
Toxicity variable

Nov., page 8

BLACKBERRIES

Verticillium wilt
Resistant varieties

Jan., page 8

BOX MAKING

Pear, apple, grape
Methods and costs

Feb., page 2

BRUCELLOSIS

Bovine
Detection of carriers

Feb., page 6

BURNS, CONTROLLED

Costs
Wildfire and controlled

Sept., page 8

Regrowth of forage
Composition and yield

Oct., page 12

Reseeding
Self-seeding predominates

Oct., page 11

C

CARROTS

Fumigation
Root knot nematode

July, page 6

Food value
Effect of production

Dec., page 4

CHERRY

Cherry fruit sawfly
Pre-bloom spray control

March, page 14

CHRYSANTHEMUM

Verticillium wilt control
Culture-indexing, fumigation

May, page 9

CITRUS

Biuret
Toxic form of nitrogen

June, page 7

Leaf symptoms

Nov., page 8

Crop rotation
On old citrus soils

June, page 12

Cutworms
Spray treatment

July, page 15

Exocortis
Transmission tests

April, page 4

Fluoride injury
Smog component

May, page 12

Frost damage insurance
Based on temperature

June, page 2

Hormone treatment of seeds
Sweet orange

Feb., page 8

Oranges, irrigation
Effect of various practices

Oct., page 8

Orange production
Nitrogen experiments

April, page 6

Rejuvenation study
Production and fruit size

Oct., page 9

Seedling growth
2,4-D treatment in roots

April, page 7

Shellbark of lemon
Role of fungi

June, page 10

Sodium in lemon collapse
Content of root tissues

Sept., page 14

Sodium in seedlings
Varietal reactions

Sept., page 12

Soil, old citrus
Crop rotation

June, page 12

Sulfur in fertilizer
Orange production

July, page 11

Sweet orange seedlings
2,4-D treatment of seeds

Feb., page 8

CITRUS (*Continued*)

Valencia fruit size
Calcium-magnesium ratio
July, page 13
Calcium acid phosphate
Aug., page 11
Wind machine tests
Citrus frost protection
Aug., page 8

CLOVER

Clover case bearer
Ladino seed pest
Aug., page 7
Yellow clover aphid
Alfalfa pest new in state
Sept., page 5

COACHELLA VALLEY

Drainage and reclamation
Observation wells
March, page 3

CONTROLLED BURNS

Costs
Affected by acreage
Sept., page 8
Forage regrowth
Composition and yield
Oct., page 12
Reseeding
Self-seeding predominates
Oct., page 11

CORN

Feeding trials
Laying hens
March, page 15
Mechanical picker
Antelope Valley tests
May, page 11

COTTON

Acreage allotments
Shifts in land-use
Jan., page 2
Nitrogen fertilization
Investment evaluation
Aug., page 2

CROP ROTATION

Alfalfa
Cotton acreage allotments
Jan., page 2
Beans on ricelands
Subirrigation with moles
Aug., page 5
Citrus replants
Cropping old soils
June, page 12

CUTWORMS

Citrus infestation
Controlled by spray treatment
July, page 15

D

DAIRY PRODUCTS

Milk
Rancid flavor in fresh milk
Oct., page 5
Seasonal purchase
Sacramento surveys
Feb., page 13
Seasonal use
Sacramento surveys
Jan., page 14
Milkers
Pipeline
Oct., page 5

DEER

Parasites
Mutual with sheep
July, page 5

DEMETON

Systemic insecticide
Citrus pests controlled
Nov., page 13

DISEASES, PLANT

Exocortis of citrus
Transmission studies
April, page 4
Shellbark of lemon
Role of fungi studied
June, page 10
Streptomycin tests
Antibiotic effective
March, page 7
Verticillium wilt
Resistant blackberries
Jan., page 8
Chrysanthemum
May, page 9

DRAINAGE

Reclamation problems
Coachella Valley studies
March, page 3

DUST

Westside dust control
Cover grass tested
Feb., page 4

F

FARM

Population
Composition
Nov., page 2
Categories
Dec., page 2

Structures

Swine
June, page 8
Cattle
Aug., page 3

FEED

Corn or barley
Trials with laying hens
March, page 15
Earth materials
Growth trials with chicks
May, page 14
Salt-concentrate mixtures
Self-fed to range animals
Jan., page 3
Safflower meal
Digestion trials for livestock
May, page 15
Winter trials
Lambs
Jan., page 5

FERTILIZATION

Turf grasses
Plugs to change
Feb., page 5
Uramite
Nitrogen source promising
Sept., page 11

FIG

Scale, biological control
In San Joaquin Valley
Aug., page 13

FILMS

Food packaging materials
Penetrated by insects
June, page 3

FOLIAGE

Leaf sampling punch
New research tool
June, page 13

FOOD PACKAGING

Flexible films
Penetrated by insects
June, page 3

FORAGE

Controlled burning
Costs affected by acreage
Sept., page 8
Coyote brush
Chemical control
April, page 15
Regrowth
Composition after burning
Oct., page 12
Reseeding
Controlled burns
Oct., page 11

FROST

Insurance
Based on temperature
June, page 2
Wind machines
Studies in citrus
Aug., page 8

FROSTED SCALE

Walnut pest
Parathion sprays
Jan., page 10
Natural enemies
April, page 9

FRUIT, CANNED

F.o.b. prices
Reflect industry experience
Oct., page 3

FUMIGATION

Carrot and beet roots
Nematode control
July, page 6

G

GOPHERS

Poison gas and bait
Efficiencies compared
Oct., page 7

GRAIN

Khapra beetle
New pest of stored cereals
Sept., page 7
Lindane-treated
Repellent to pheasants
May, page 13
Stored grain pests
Protective measures
Sept., page 6

GRAPE

Box making
Methods and costs
Feb., page 2
Mealybug
Infestation reduced
March, page 11
New host
Ground pearl
Dec., page 5
Surplus
World-wide
Oct., page 4

GROUND-WATER

Overdraft in Antelope Valley
Water resources limited
March, page 2

GROUND-WATER (Continued)

- Increasing demands
April, page 2
- Balance required
May, page 2

H

HARVESTER

- Asparagus
Improved
Sept., page 3
- Corn
Antelope Valley tests
May, page 11
- Legumes
Small seed
Nov., page 3

HAY

- Alfalfa, profits
Jan., page 2

I

INSECTICIDES

- Soil absorption
Effect on plants
March, page 9
- Field, greenhouse studies
April, page 13
- Systemic, study of
Radio-phosphorus tracers
June, page 5

INSECTS

- Aphid
Parathion resistant strain
May, page 8
- Thorough spray coverage
July, page 4
- Artichoke plume moth
Infestation costly
July, page 7
- California survey
Distribution study
May, page 3
- Cherry fruit sawfly
Pre-bloom spray
March, page 14
- Clover case bearer
New pest of Ladino seed
Aug., page 7
- Codling moth
Controlled on walnuts
Aug., page 12

- Fig scale
Biological control
Aug., page 13
- Film penetrating
Package food
June, page 3
- Frosted scale
In southern California
Jan., page 10

- In northern California
April, page 9

- Grape mealybug
Controlled infestation
March, page 11

- Khapra beetle
New grain pest
Sept., page 7

- Spider mite
On apples
June, page 14

- Stored grain
Infestation control
Sept., page 6

- Sunflower moth
Parathion, DDT tests
April, page 11

- Survey, California
Distribution
May, page 3

- Thrips, western flower
Surface injury to plums
Feb., page 9

- Yellow clover aphid
New alfalfa pest
Sept., page 5

- Wood-boring
Electronic listening device
Nov., page 5

- Woolly apple aphid
Late summer infestations
June, page 14

INSURANCE

- Citrus losses
Based on temperature
June, page 2

IRRIGATION

- Alfalfa
Effect on water table
May, page 4

- Infiltration rates
Wetting agents
Jan., page 12

- Pipe systems
Hydraulic characteristics
Feb., page 3

- Oranges
Effects of various practices
Oct., page 8

- Subirrigation
Use of artificial moles
Aug., page 5

L

LADINO CLOVER

- Case bearer
New pest of seed
Aug., page 7

LEMONS

- Exocortis
Transmission tests
April, page 4
- Shellbark of lemon
Role of fungi
June, page 10
- Sodium in lemon collapse
Content of root tissues
Sept., page 14

LETTUCE

- Deterioration in storage
Time and temperature
Aug., page 14

LIMA BEANS

- Freezing defect
Wrinkled seed coat
Nov., page 7
- Heat tolerant
New variety
March, page 5
- Quality in frozen
Effect of processing
Nov., page 6

LIVESTOCK

- Brucellosis, bovine
Detection of carriers
Feb., page 6
- Feed
Animal utilization
Aug., page 3
- Safflower meal tests
May, page 15
- Self-fed supplements
Jan., page 3
- Sheep winter fed
Jan., page 5
- Forage
Controlled burn costs
Sept., page 8
- Chemicals on coyote brush
April, page 15
- Composition after burns
Oct., page 12
- Self-seeding on burns
Oct., page 11
- Shades
Construction
Aug., page 3
- Sheep
Parasites
July, page 5

- Replacement ewes
Dec., page 8
- Self-fed concentrates
Jan., page 3
- Winter feeding alfalfa
Jan., page 5
- Swine
Shades
June, page 8

M

MACADAMIA NUT

- In California
Adaptability studied
April, page 3

MARKETING

- Broilers
Policies of hatcheries
Dec., page 6
- Fruit and vegetables
Truck hauling
Oct., page 2
- Grapes
World-wide surplus
Oct., page 4
- Rice
Domestic and foreign
July, page 2
- Turkeys
Trends in processing
Sept., page 2

MELON

- Fruit set
Pollination tests
July, page 3

MILK

- Rancid flavor
Causes in fresh milk
Oct., page 5

MILKER

- Pipeline
Effect on off-flavor
Oct., page 5

MOLES

- Artificial
Subirrigation
Aug., page 5

N

NEMATODE

- Brassica-root
New in California
Jan., page 13
- Root-knot
Soil fumigation
July, page 6

NITROGEN

Biuret
Toxic to avocado and citrus
June, page 7

Leaf symptoms of toxicity
Nov., page 8

Cotton fertilization
Investment evaluation
Aug., page 2

Losses in soil
Sulfur application
Jan., page 11

Orange production
Requirements vary
April, page 6

Synthetic source
Low solubility
Sept., page 11

O

OLIVES

Sevillano
Rooting leafy cuttings
May, page 6

Canned, off-flavor
Insecticides on trees
Oct., page 13

ORANGES

Exocortis
Transmission tests
April, page 4

Hormone treatment of seeds
Sweet orange
Feb., page 8

Orange production
Nitrogen experiments
April, page 6

Sulfur in fertilizer
Orange production
July, page 11

Sweet orange seedlings
2,4-D treatment of seeds
Feb., page 8

Valencia fruit size
Calcium-magnesium ratio
July, page 13

Calcium acid phosphate
Aug., page 11

P

PARASITES

Deer and sheep
Transference factors
July, page 5

PEACHES

Canned, f.o.b. prices
Reflect industry experience
Oct., page 3

PEARS

Bartlett
Russetting cause sought
March, page 6

Rox making
Methods and costs
Feb., page 2

Canned, f.o.b. prices
Reflect industry experience
Oct., page 3

PESTICIDES

Effect on crops
Absorption by soil
March, page 9

Off-flavor in olives
Sprays on trees
Oct., page 13

PHEASANTS

Seed grain repellent
Lindane treated
May, page 13

PINE, PONDEROSA

Drought survival
Seedlings
July, page 9

Reverse transpiration
Ability of seedlings
Dec., page 7

PLANT

Breeding
Heat tolerant limas
March, page 5

Stocks
Feb., page 11

Tomatoes, canning
Nov., page 12

Melon fruit set
July, page 3

Diseases
Exocortis of citrus
April, page 4

Shellbark of lemon
June, page 10

Streptomycin tested
March, page 7

Verticillium wilt
Jan., page 8
May, page 9

PLUMS

Cherry fruit sawfly
Pre-bloom spray control
March, page 14

Thrips
Western flower
Feb., page 9

POINSETTIA

Holiday blooming
Bud initiation dates
Jan., page 9

Timing
Dec., page 3

POPULATION

Agricultural
Composition
Nov., page 2

Categories
Dec., page 2

POULTRY

Broilers
Hatchery prices, policies
Dec., page 6

Bronchitis
Vaccines
May, page 14

Drinking water
Heating tests
Jan., page 7

Feeding trials
Laying hens
March, page 15

Growth trials
Earth materials
May, page 14

PRODUCE

Interstate shipment
Trucks
Oct., page 2

PUNCH

Leaf sampler
Research tool
June, page 13

R

RADIO-PHOSPHORUS

Tracers
Systemic insecticides
June, page 5

RANGE

Controlled burning
Costs affected by acreage
Sept., page 8

Coyote brush
Chemical control
April, page 15

Ewes
Nutrient level
Jan., page 3

Regrowth
Composition after burning
Oct., page 12

Reseeding
Controlled burns
Oct., page 11

RECLAMATION

Alkali soil
Gypsum
July, page 10

Drainage problems
Coachella Valley
March, page 3

RICE

Markets
Domestic and export
July, page 2

S

SAFFLOWER

Seed meal
Digestion trials
May, page 15

Sunflower Moth
Control treatments
April, page 11

SHADES

Construction and location
Livestock feed utilization
Aug., page 3

Swine
June, page 8

SHEEP

Alfalfa winter feeding
Imperial Valley
Jan., page 5

Ewe lamb replacements
Supplemental feeding
Dec., page 8

Parasites
Mutual, sheep and deer
July, page 5

Salt concentrate mixtures
Self-fed on range
Jan., page 3

SMOG

Fluoride injury
Air pollutant
May, page 12

SOIL

Alkali soil reclamation
Tulelake Basin
July, page 10

Avocado seedlings
Sodium-potassium
Feb., page 7

Citrus replants
Crop rotation
June, page 12

Citrus seedlings
Sodium nitrate
Sept., page 12

Drainage and reclamation
Coachella Valley
March, page 3

Dust plots
San Joaquin Valley
Feb., page 4

Infiltration rates
Wetting agents
Jan., page 12

Insecticide absorption
Effect on plants
March, page 9

Field, greenhouse studies
April, page 13

Oxidation of sulfur
Nitrogen losses
Jan., page 11

Sodium
Lemon tree collapse
Sept., page 14

Wetting agents
Infiltration rates
Jan., page 12

SQUASH

Orange banana
New variety
June, page 15

STOCKS

Double-flowered
Extra chromosome
Feb., page 11

Mineral nutrition
Calcium-potassium ratio
Sept., page 10

STREPTOMYCIN

Plant diseases
Antibiotic effective
March, page 7

SULFUR

Fertilizer program
Tests with oranges
July, page 11

Oxidation in soils
Nitrogen losses
Jan., page 11

SUNFLOWER

Moth
Parathion and DDT
April, page 11

SUPPLEMENTAL

Salt concentrate mixes
Self-fed
Jan., page 3

SWINE

Feed utilization
Environment
June, page 8

SYSTEMIC INSECTICIDE

Insects and mites
Controlled on citrus
Nov., page 13

T

TEMPERATURE

Citrus frost protection
Wind machines
Aug., page 8

Citrus crop losses
Insurance
June, page 2

Effect on swine
Feed utilization
June, page 8

Lettuce
Storage losses
Aug., page 14

Livestock shades
Environment
Aug., page 3

TERMITES

Detection of pests
Listening device
Nov., page 5

TOMATOES

Canning
Improvement by breeding
Nov., page 12

TRACERS

Radio-phosphorus
Systemic insecticides
June, page 5

TRUCKS

Produce marketing
Transportation
Oct., page 2

TURF

Differential fertilization
Use of plugs
Feb., page 5

TURKEYS

Marketing
Trends in processing
Sept., page 2

U

URAMITE

Nitrogen source
Low solubility
Sept., page 11

V

VACCINES

Infectious bronchitis
Laying hens
May, page 14

VERTICILLIUM

Wilt
Blackberries, resistant
Jan., page 8

Chrysanthemum
May, page 9

W

WALNUTS

Aphid
Parathion resistant
May, page 8

Spray coverage
July, page 4

B vitamin
Walnut meat studies
Nov., page 15

Codling moth
Successful control
Aug., page 12

Frosted scale
Southern California
Jan., page 10

Northern California
April, page 9

Paradox hybrids
Rooting
May, page 7

WATER

Alfalfa
Effect on water table
May, page 4

Drainage, Reclamation
Coachella Valley
March, page 3

Ground-water overdraft
Antelope Valley
March, page 2

Increasing demands
April, page 2

Balance required
May, page 2

Heating
Poultry
Jan., page 7

Infiltration rates
Wetting agents
Jan., page 12

WETTING AGENTS

Infiltration rates
Field tests
Jan., page 12

WIND MACHINES

Frost protection
Studies in citrus
Aug., page 8

WINERY WASTES

Effective disposal
Abatement of odors
Nov., page 11

WOOD-BORING

Insects located
Listening device
Nov., page 5
