

TABLE OF CONTENTS

JULY-SEPTEMBER 2010 • VOLUME 64 NUMBER 3

COVER: The edges of Los Banos, a city of more than 30,000 in Merced County, are irregular, creating more opportunities for urban-agricultural conflict (pages 121, 127). Geographic information systems (GIS) are being used to more accurately assess land use, aiding in regional planning and farmland conservation (pages 118, 129).

Research articles

- 121 **California communities deal with conflict and adjustment at the urban-agricultural edge**
Sokolow et al.
Communities in Monterey and Merced counties were studied to understand why edge conflicts develop and how various factors affect levels of discord.
- 127 **Confined facilities create conflicts in San Diego communities**
Sokolow, Lobo, Hukain
- 129 **A new method is used to evaluate the strategic value of Fresno County farmland**
Schmidt et al.
Applying GIS to existing land-assessment practices can serve as a model for regional farmland conservation and land-use planning.
- 135 **Mitigation techniques reduce sediment in runoff from furrow-irrigated cropland**
Long et al.
PAM treatments, vegetated ditches and sediment traps differ in their ability to reduce sediments in tailwater in furrow-irrigated crops.
- 141 **Dry-season soil water repellency affects Tahoe Basin infiltration rates**
Rice and Grismer
Measuring rainfall infiltration rates in Tahoe soils is important to understanding runoff and erosion, and protecting lake clarity.
- 149 **Survey examines the adoption of perceived best management practices for almond nutrition**
Lopus et al.
Growers using perceived best practices tend to have larger farms; small growers may face barriers to adoption.
- 155 **Distinctive symptoms differentiate four common types of berry shrivel disorder in grape**
Krasnow et al.
Sugar accumulation disorder, bunchstem necrosis, dehydration and sunburn can be distinguished by type and location of fruit damage.

News departments

- 117 **Letters**
- 118 **Outlook**
Budget cuts threaten the Williamson Act, California's longstanding farmland protection program
Sokolow
- Sidebar:** Major features of the Williamson Act

Continue receiving *California Agriculture*?

Dear valued reader:

To continue receiving this journal, you must renew now.

Either:

Go to: <http://californiaagriculture.ucanr.org/subscribe.cfm>

Enter your subscriber number (above your name on the address label) and fill out the brief questionnaire.

Or:

Fill out and return the postage-paid postcard on the wrapper, carefully folding and tearing along the perforations.

If you responded already, or started a new subscription in 2010, you need not renew.

International subscribers should start or renew paid subscriptions at <http://californiaagriculture.ucanr.org/subscribe.cfm>.
