

Blast from the past

What a blast from the past. One of my co-workers e-mailed me the April-June 2010 issue of *California Agriculture* after seeing my picture in it, and there I was, feeding calves (page 61). I was actually a student intern that spring in plant taxonomy at the Sierra Field Station at Browns Valley, and stayed the summer feeding cows and calves. My name was Marla Shapiro at the time,

Knight in 1974

it was the summer of 1974, I was 20 years old, and I believe my mom took that picture while visiting.

I was a sophomore at UC Davis, had just failed organic chemistry, and was looking for a break from math, chemistry and physics! My interest in botany led me to the internship, where I was one of two students creating the herbarium at the station. It changed my life. I've been a botanist now for 30 years at the Klamath National Forest in northern California (I repeated organic chemistry successfully).

My co-workers are tickled at this part of my life that they knew nothing about, especially my friends at the county agriculture department. Thanks for bringing back memories of a great time.
